PORTABLE SPLITTER BOX **ATEX & IECEX**

Security. Portable. Useful.

Delvalle, wide experience in manufacturing solutions for hazardous area

WE PUT AT YOUR DISPOSAL

We offer over **45 years** providing hazardous area **solutions** to demanding customers who require very specific characteristics and behaviour according to the sector and their needs.

WHEREVER YOU GO

We are committed to working closely with our customers, providing them with exceptional service and offering an advanced and **extensive range of hazardous area products** with very competitive prices.

CONSULTING & ENGINEERING

Atex Delvalle adapts to our clients' needs by offering hazardous-area systems.
Certified Junction Box Assembly.
Atex-delvalle are the leading certified assembler of Ex junction boxes. With an extensive stock holding of stainless steel enclosures, our workshops are able to provide unrivalled competence, expertise, quality and service to customer specifications.
Our customized services, experienced design and drafting 3D support.

HIGH STANDARD OF QUALITY AND SERVICES

We only use materials provided by companies who offer the very highest quality, suitable and certified products. Our success is due to **top quality** assurance:
ISO 9001, SGS, UL, TÜV, ISO 14000, Ohsas 18001, **ATEX, IECEx.**

PORTABLE SPLITTER BOX **ATEX & IECEX**

Security. Portable. Useful.

**High Reliability, Simple Use,
Guarantee and Safety**

Example

The Ex splitter box is designed to get two or more sockets as outputs by one current input, allowing this way us to use more than two plugs from a large distance to devices.

The splitter box is a secure device, comfortable and useful, which is protected thanks to an ATEX & IECEX enclosure specially designed, water-proof, antirust and made in stainless steel AISI 304L which guarantees an IP66 protection. This enclosure is CE marked to the ATEX Directive for safe use in zones 1 and 2 potentially explosive gas and zones 21 and 22 dust atmospheres, making it ideal for power distribution within hazardous area confined spaces.

To make easier the movement of this enclosure it has a handle on the cover, to move it to the right place.

PORTABLE SPLITTER BOX **ATEX & IECEX**

Example

Security. Portable. Useful.

TECHNICAL FEATURES

It's equipped with a 5m long cable, which allows us to connect devices to the socket when they are remote.

The maximum rated tension is 550V and the rated current is 32A.

Its weight is 6 kg, and its design is compact and stable.

It can work between two temperature ranges, which give it a higher use capacity:

- $-20^{\circ}\text{C} \leq T_a \leq 60^{\circ}\text{C}$
- $-20^{\circ}\text{C} \leq T_a \leq 40^{\circ}\text{C}$

ATEX & IECEX enclosure:

- Finish with stainless steel AISI 304L.
- It has four legs to place it where it's necessary.
- It includes three cable glands in nickel plated brass with "Ex e" protection in M25 with IP68 protection.
- On the cover, the enclosure has a handle to move it.

ADVANTAGES

- The first one is the ability to power ancillary remote equipment.
- The maintenance work is easier with this splitter box because you can make your work far from the general sockets.
- Thanks to this splitter box, the possibilities of connecting devices to the enclosure are increased, because it's possible to place some sockets, being able to connect many devices at the same time.
- It's possible to cut off the current thanks to an emergency button on each connector.
- We can move it without problem because its weight is 6kg, enough to be light but strong at the same time.
- Possibility of manufacturing the ATEX & IECEX enclosure in stainless steel AISI 316L.

PORTABLE SPLITTER BOX **ATEX & IECEX**

OPTIONS

- There are three current options: 20A, 32A or 63A.
- The number of poles and the way they are connected can be selected between two and five, including neutral and ground cable.
- Ask us about:
- Cable longer
- Different features of this splitter box.
- More than two sockets to connect some plug (the enclosure's size would change).

PROTECTION MODE

This equipment is certificated for use it in potentially explosive atmospheres in I, 2, 21 and 22 zones.

- ATEX mark:
 - II2G Ex d e IICT6/T5 Gb
 - II2D Ex tb IIIC T85°C / T100°C Db
 - Certificate number: LO-MI4ATEX2082
- IECEX mark:
 - Ex d e IICT6/T5 Gb
 - Ex tb IIIC T85°C/T100°C Db
 - Certificate number: EX/LOM/IECEX
